WILL STAY OUT MONTH

Chamouni Miners Take Action on Strike Question

AWAITING THE RESULT

Crescent Diggers May Go Out if Some Settlement is Not Effected Soon

Miners of the Chamouni mine of the Monongahela River Consolidated Coal and Coke company, who went on strike the first of last week because of contentions over the use of safety lamps, will stand out until the present contract expires the end of this month. At the Crescent mines where 1,000 miners are employed, the same trouble exists. At a meeting of the miners of the latter mine Sunday action was taken to continue working until Wednesday, when if something definite is not accomplished, there will probably follow a general strike.

Miners of the Chamouni mine held a meeting Sunday. Besides taking action to stand out until the contract expires, March 31, it was decided to take up the matter with the National Executive Board. An appeal will be formulated also to this board. District officials will be asked to aid in securing peace. The action is nearly identical with that taken at a separate meeting by the Crescent miners.

The miners claim that the use of the open lamp is not allowed in cutting pillars and stumps, but that the electrical machines are. They contend that the electrical machines throw off sparks and make working as dangerous as though the open lamp were used. In addition the use of the safety lamps, which are awkward to handle they say decreases their earning power considerably.

What the miners want is the removal of the electrical machines in the dangerous places, or where they are used that open lights be permitted.

CONNELLSVILLE TO PLAY THEIR LAST TONIGHT

Connellsville, headed by Captain Dark, will appear on the Charleroi basketball floor for the last time of the season tonight. Connellsville has been putting up a fast game recently defeating Uniontown, and Johnstown with astonishing regularity. Captain Jack Adams is confident that the hoodoo which has been pursuing Charleroi for the last eight games will be broken tonight. He says that although many hard battles have been fought recently, the team is not now in as bad condition as it might be. Both tonight's game and Friday's game, the last of the season will be "Boosters."

Sent to Home.

William H. Smiley of Fallowfield township was taken to the county home at Arden today and it is expected that he will be recommended to the Poik home for the Feeble Minded.

Chestnut Blight in The State

Commission at Work to Prevent Heavy Destruction—This County Suffers

Prompt measures are being taken by the State Chestnut Tree Blight Commission to save chestnut trees in Western Pennsylvania counties, where the blight has been found to exist. When the inspection of chestnut trees was first started it was believed that the blight would be confined to the section east of the Allegheny mountains. Inspectors lately have discovered that evidence of the blight has been found in Washington, Fayette and Somerset counties, although generally in very isolated instances. There was no general discovery of the disease except in one instance which occurred in Washington county. In this case 83 trees were found infected by blight and every one was cut down and the infected portions burned.

STRIKE ON AT JUMBO

Miners of Pittsburg Coal Company at McDonald Quit

OPPOSE LOCKED LAMPS

A strike of serious proportions was declared Friday by the miners employed at the Jumbo mine of the Pittsburg Coal company on the Panhandle road near McDonald. About 800 men are affected.

The Coal company has nothing to say about the trouble, but it is understood that the trouble arose over the order of the superintendent, Leonard Sarver, that the cutters in the mine equip themselves with locked safety lamps. It is not known whether or not this order came from one of the mine inspectors, but it is assumed that it did, and that the superintendent was simply obeying the orders of the mine inspector.

The cutters who use an electric cutting machine, object to the use of the locked lamps. Miners do not like to use these lights unless they are compelled to do so. They do not give so good a light, they say as the open mining light, and are more difficult to take care of. Miners take the view that in an electrically operated mine that a locked safety lamp is not needed and if they are forced to use them in a mine, it means the abandonment of the electrical operation of the mine.

The Jumbo mine is electrically equipped, the Pittsburg Coal company having spent many thousands of dollars in improving the mine with electrical equipment. Where electric cutting machines are used there is an almost continuous flash and sparkle during their operation, and the miners insist that there is no need for the safety lamp if the mine is safe enough to use the electric cutting machine, which is, in their contention, as dangerous as an open light where a mine is gaseous.

LIONESS TERRORIZES COUNTY SEAT FOLKS

Tawny Brute Drops From Baggage Car to Station Platform and Starts on Tour of Investigation

Washington, the staid old county seat, had a real and genuine lion hunt Sunday. A full grown lion, or lioness, rather, roamed at large for a brief space of time, and created a veritable reign of terror in the community in which her royal highness appropriated for the time being. No one was hurt, but the number of people who were badly scared have not yet been counted.

It all happened in this way. A traveling show whose outfit consists mainly of lions—seven of them—arrived in Washington from Waynesburg over the narrow gauge road. The arrival attracted the usual crowd of curiosity seekers, and when the draymen started to unload the lion cages to transfer them to a baggage car on the Pennsylvania railroad, about 100 persons had congregated. In making the transfer one of the cages was dropped, and the occupant, a magnificent lioness named Pasha, was spilled out.

That's where the "skedaddling" began, and the getaways from the cage are said to have broken all sprinting records on the W. & J. track. One of the first persons Pasha met was a negro with a bundle. The latter dropped the bundle and fled, and those who saw him are under the impression that he's running yet. The bundle happened to be a quart bottle of whiskey, which smashed to smithereens.

The fumes did not please Pasha, who changed her course. Meeting two small children who regarded her as "a big dog", she did not molest them. A number of other pedestrians were encountered, all of whom lived and will tell their grandchildren in after years of their hairbreadth escapes. Finally Pasha began to get cold feet from her unaccustomed contact with the frozen ground, and began to look for shelter.

Spying a boiler house of an oil well near the Trinity Hall grounds, Pasha sought shelter. The fireman was in the act of shoveling coal into the furnace when he heard a grunt back of him and turned around to find himself gazing into the face of a full grown beast of the jungle. Making a headlong dive through an opposite window, the fireman also made a sprinting record.

By that time the show people were hot on the trail of the lioness and the fireman was putting distance between himself and the boiler house. Marguerite Smith a young girl connected with the show, went in and captured Pasha and stood guard over her until a wagon with the cage came up, and the beast was once more safely in captivity. This was one case where the female of the specie did not prove more deadly of the kind.

May Beseech Council to Investigate

Citizens to Appear Before Borough Fathers Regarding Court Case

A delegation of citizens have arranged to meet with council tomorrow night in order to further consider a case from Charleroi that came before the grand jury at the last session of court that has a bearing on the morals of the community. This was the case where three young fellows were arrested for an offense against morality. Two of the youths confessed and were sentenced to Huntingdon reformatory, while the other case was nolle prossed. It is stated, without the consent of the private prosecutor. As there were eight others implicated in the offense, and all but the three skipped out to avoid arrest at the time, many citizens feel that the case should not have been dropped.

The delegation will meet first at the burgess' office at 8 o'clock and will proceed to the council chamber, where they expect to ask the aid of council and the borough officials in further effort to reopen the case in order to protect the community from a repetition of the offense.

WILL TAKE UP SCALE

Miners' Committee and Operators' Committee to Meet at Chicago

TO RENEW CONTRACT

Representatives of miners and operators in the Pittsburg District, as well as the bituminous districts throughout the United States, will meet in Chicago tomorrow to make arrangements for a second joint wage conference before the expiration of present contracts on March 31. This announcement was made at Indianapolis Saturday by John P. White, President of the United Mine Workers of America, who had just returned from the anthracite wage conference in New York.

The 250,000 bituminous union miners of the United States are demanding a seven hour work day, with five hours on Saturdays and an approximate general increase of 20 per cent in wages. At the previous conference in Indianapolis the operators flatly refused to consider the miners' demands and presented counter proposals calling for a longer work day and a wage decrease.

President White in his office at Indianapolis refused to discuss the probability of a strike that will tie up the coal mining industry in the United States similar to the present nation-wide suspension of a work in Great Britain. He also refused to comment in any way on the coming conference.

QUESTION IN NAME

Should Presidential Candidate be Given Preference?

IS COMPLICATED AFFAIR

Candidates for Delegate at Sea on Ballot Matters in This and Other Counties

Through a misunderstanding the Mail was in error when it announced Saturday that County Controller John H. Moffitt of Charleroi, and J. Olan Yarnell of California, were Roosevelt candidates for delegate to the National Republican convention at Chicago from the Twenty-fourth Congressional district. Both have announced as Roosevelt candidates for delegate to the State convention, instead of the National convention. The ranks of Roosevelt candidates for State delegate have been augmented by the names of Theodore Landefeld of Monongahela, and Attorney Julius P. Miller of Washington, who filed their petitions Saturday, with a request that the words that they will support Roosevelt for President be printed below their names on the official primary ballot. So far as known, Attorney Owen C. Underwood of Washington, is the only Roosevelt candidate to announce in Washington county for the election of State National delegate. Attorney James P. Eagleson is supposed to be a candidate in the interest of President Taft.

It is stated that thus far Isaac W. Baum, solicitor for the county commissioners, has refrained from ruling on the petitions of candidates for State delegate, to have the name of the man whom they will support for president, place after their names on the primary ballot. There is a difference of opinion regarding the meaning of the Act of Assembly regarding the placing of the name of the candidate whom any delegate will support in the convention, after the delegate candidate's name. The Act reads:

"Each candidate for delegate shall have the right, by filing a request with the county commissioners, to have printed at the right of his name upon the official ballot, in the space provided for that purpose, the name of the candidate whom he will support in the convention."

The interpretation of the Act hinges on the meaning of the word "support" in the law. The Roosevelt delegate candidates assert that the law means the name of the presidential candidate whom they favor. Some attorneys argue that it refers to the 12 delegates-at-large whom the delegate will vote for in convention and who in turn will vote for a presidential candidate at the national convention. Should the latter interpretation be ruled as the proper one, then it would mean that each candidate for delegate to the state convention would perforce have the 12 names of candidates for delegate-at-large placed after his name on the

east thereof; 11 p. m., planet Jupiter
at quadrature with the sun, 90 degrees
west thereof, either sets when the other
rises and vice versa.

CONSULTING THE PEOPLE.

President Taft has taken the ini-
tiative in a movement to bring busi-
ness men of the country into touch
with the Government for advice and
counsel in the administration of laws,
the enactment of new statutes and
the development of commerce. He
has called a convention of delegates
from commercial organizations in all
parts of the country to meet in
Washington on April 15, for discus-
sion and to plan the organization.
Invitations have been sent to 1,000
local chambers of commerce, boards
of trade and other commercial bodies.
Responses to the announcements of
the tentative plan have been such
that President Taft is convinced the
time is ripe for putting the proposal
to the test of practical experiment.

Hitherto it has usually been the
special interests that have been con-
sidered by the National administra-
tion. In a country that had af-
fected to be affected by Nation-
al action, and action were invariably
of such a nature that they came, these
localities, with the people gen-
erally were indifferent, as a matter
of course got the most consideration.
It is to offset this influence that
President Taft has called the dis-
interested business men into consulta-
tion, the ones who have no axes to
grind, and to confer with them on the
general needs of the country. This
is a most excellent move, and dem-
onstrates President Taft's desire

to administer to the general welfare
of the public rather than to the spe-
cial interests.

PROGRESS IN ROADS.

The coming season promises to
bring great progress in road build-
ing that will materially affect Char-
leroi. With what the county and
State are likely to construct this sea-
son connections will be made with
outlying sections of country that
should have a material effect in pro-
moting intercourse with the country
distinctly and extending trade rela-
tions with the same.

In all probability direct communi-
cations will be made between Char-
leroi and Monongahela on the north
and between at least Speers on the
south, and possibly as far as Roscoe
or California in that direction on the
State highways, while the extension
of one of the routes through Char-
leroi to the Maple Creek road will
result in the paving of Lincoln ave-
nue in the borough. This, with the
connection the county is building at
the end of the Maple Creek road, to
connect with the old National pike,
will give direct communication by
improved roads to the county seat.

These are the improvements that
are looked for in this section this
year, and if they all materialize, it
will be a great help to the prestige
and standing of Charleroi, as well
as every other town along the valley.

ELECTRIC SPARKS

The Congressional Record is in a
similar position to the houn' dog of
Champ Clark fame.

Small men have the advantage
after all. At least an advertisement
in a city paper informs its readers
that for small size men, the price
of clothing is correspondingly less
than for big fellows.

Some people think it wouldn't be
worth while being vice president of
the United States because there
isn't much chance for promotion.

A la Mode.

Milady wears a sealskin coat,
Her muff of mink is also there;
A fur hat trimmed with nunny goat—
Her ankles and her neck are bare.
—Youngstown Telegram

Milord affects a fur coat, too.
And proudly thinks: "I'm there!"
A wintry wind goes whistling thru
His summer underwear.
—Johnstown Democrat.

A pupil in the New York Common
schools was absolved of the charge
of truancy because he had to shave
three times a week. It is a fitting
vindication of whiskers.

A man may not get the benefit of
many birthdays, but look at the glory
he has out of being born on leap
year day.

Most any State and sometimes the
Y. M. C. A. can produce great men.
For the latter, look at Dr. Sun Yet
Sen.

A seat in a city street car is such
a rare thing that the average man
simply cannot refrain from hanging
on to it.

The bad little boys in this old town
Are always pullin' my sausage down;
I don't care if it was a houn'
They gotta quit pullin' my sausage
down.
—Philadelphia Star.

The spring hero is the big leaguer
leaving for his southern training
camp.

"Child's plea moves Taft," reads a
headline. Which prompts an ex-
change to remark that taking it lit-
erally it must have been some plea.

A Cure for the Blues.

What! Moping just because the skies
Are dull and dark, and gray?
Dejected, long faced just because
The rain beats down today?
Why, bless you, child! It doesn't help!
To let the tears drip, too.
Just wipe your eyes and look around
For some good work to do.

There's nothing helps when you are blue
Like helping set things right.
Kind service fills the darkest day
With sweetness and with light.
And when you're feeling out of sorts
The very wisest plan
Is to find out what others want
And help them all you can.

So look around and study up
Some helpful thing to do.
You'll find that cheering others' lives
Will brighten life for you.
Look up the real unfortunates,
And ease their aches and pains,
And while you feel you're doing good
You'll never know it rains!

PICKED UP IN PASSING

"It takes twice as many men in
England as in the United States to
mine the same amount of coal," said
John J. Oates who is a sanita-
inspector in the State Health Depart-
ment, and was home over Sunday
from Mercer county, where he is
operating at present. "The reason
for this is that machine mining is not
conducted in England anywhere near-
ly so extensive as in this country.
There the greater proportion is pro-
duced by pick mining.

"I first began my mining career
in the deep shafts of Yorkshire, Eng-
land where at the age of 12 years I
became a trapper boy, opening and
shutting a door that regulated the
air currents. The shaft was 500
yards or 1,680 feet deep. It was ex-
tremely gaseous, but such was the
care taken that no explosion ever
occurred while I was there. We used
what were called the Belgium safety
lamps, about 18 inches in height,
which had to be carried in a perfect-
ly perpendicular position, or they
would go out. These lamps were
large and awkward to handle, but I
never knew of a better one in point
of safety, unless it is the new electric
storage battery lamps that are now
being introduced."

"On account of the way the shafts
were originally constructed it is im-
possible to use the kind of mining
machines in use in the drifts in this
country, as the most of the shafts
are too small to admit the machines
in the cage. That is why there are
so many more miners in England in
proportion to the coal mined than in
this country.

The telephone bell rang. An at-
tache of the Mail office answered
and a voice over the wire informed
him that there had been a serious
explosion. It was within a few min-
utes of press time. Instantly came
the questions, tumbling over one an-
other:
"When? Where? Any damage?
Anybody killed?"
"Well I don't know," drawled the
voice over the wire. "The wind blew
up the river. Goodbye."

SEWAGE DISPOSAL MATTER UP AGAIN

(Continued from first page.)

last few weeks the State Health De-
partment has been stirring up various
towns to action on the matter of a
sewage disposal plant, and Charleroi
has not been neglected. The State
wants the borough to have plans and
specifications prepared and sent in
for approval.

Can be done with the sew-
age disposal plant at the present
time to let the contract for plans
and specifications. It is stated that
the work of drawing them up will
not be an easy task. Much time will
be consumed in their preparation.

The matter of Lincoln avenue im-
provement with State aid may also
come up for discussion. It is firmly
believed by those in close touch with
conditions that a month or at the
most two months will witness the be-
ginning of State road work through
Charleroi.

Coffins Too Small for Him.

After literally sleeping his life away
for 33 years, John Turner, Washing-
ton's giant, seven feet seven inches
tall, was hampered in death as in life
by his size, and his undertakers could
not find a coffin in all Washington
large enough to fit him. One had to
be made in Baltimore of these amaz-
ing proportions: Eight feet long, two
and a half feet wide and one and a
half feet deep.

WISE OR OTHERWISE.

Wise is the man who knows just
when not to laugh.

Free speech has enabled many a
man to give himself away.

Some things that come to those
who wait are badly moth eaten.

The less some people are able to
annoy you the less they like it.

Some people's idea of a helping
hand is one that is lined with silver.

It sometimes happens that when a
man loses his reputation he is lucky.

The man who makes history must
be trying to encourage book agents.

Inject common sense into a love
affair and often it will die a natural
death.

If wishes were horses a lot of them
would be exchanged for pork and
beans.

Our idea of a modest man is one
who keeps his opinions of himself
under cover.

ART OF BEING KIND.

Kindness is a quality which every
girl ought to cultivate. No matter
how pretty and fascinating a woman
may be, she is of little account unless
she has a good nature as well.

Even then the wound may remain
unhealed. The great duty of life is to
be charitable and kind in both word
and action. Remember that "kind
words are the music of the world."

They have a power which seems to
be beyond natural causes. Life is
short. We should make haste to glad-
den the world all we can by human
sympathy and love.

So many lives have been marred by
unkindness, so many hearts wounded
by sharp words or bitter retorts. Much
as we may regret a hard word we
have spoken, it is out of our power
to recall it, and all we can do is to
try and efface the memory of it by a
softer phrase.

Then and Now.

Prior to the last 15 years, by the
time people had attained their first
quarter of a century, they considered
themselves pretty much formed as to
physical and mental characteristics.
If they were ambitious and energetic
they perhaps carried on some kind
of exercise for their physical well-be-
ing, and guarded against mental de-
terioration as they advanced in years
by occasionally taking up new studies
or reviewing old ones; as a dear old
lady of my acquaintance at the age of
eighty-nine began to review her al-
gebra to keep her mind active.

Now everything is changed. We
cannot settle down comfortably in the
thought of anything in the regular
division.

Adapted for High Altitude.

It is a familiar fact that living at
high altitude puts a strain on the
heart, which has more work to do.
In this connection, says Knudsen,
it is interesting to notice Strohl's
recent comparison of ptarmigan from
high altitudes and willow grouse from
the plains. He found that in ptarmi-
gan, even in the young bird, the right
ventricle of the heart is very dis-
tinctly stronger than in the willow
grouse, a specific adaptation to the dif-
ference of habitat.

Much in Little.

"What is your member of Congress
noted for?" "Well," answered Far-
mer Cornstassel, "around here he's
mostly noted for arguments that won't
go down and seeds that won't come
up."

Satan's Wiles.

"Satan is mighty hard to keep
ahead of," said Uncle Eben. "After
saying, 'G'd behind me, Satan,' dar's
always a terrible temptation to turn
around an' see whether he done as
you axed 'im."

If You Need Money Come To Us

The purpose of this company is to loan money to
those in need of financial assistance. Because of our
prompt service, low rates, and equitable treatment our
business is growing rapidly.

We loan in sums of \$10 and upwards, on house-
hold goods, without removal; all we ask, that you see
your way clear to pay it back in small weekly or month-
ly payments. We allow you from one month to one
year, if you need it.

All business strictly confidential, whether you make
a loan or not.

We make loans anywhere within 20 miles of Char-
leroi.

We are open Evenings until 8 O'clock

HARRY COULSON IS SEVERELY BURNED

Harry Coulson, a well known young
man of Donora and a brother of
"Bob" Coulson, the Brooklyn Nation-
al league outfielder, was severely
burned about the face while at work
in the Donora steel mill Saturday
afternoon. He was removed to his
home. It will be some weeks be-
fore he will be able to be out.

AVOID HARSH DRUGS

Many Cathartics Tend to Cause In-
jury to the Bowels.

If you are subject to constipation,
you should avoid strong drugs and
cathartics. They only give tempo-
rary relief and their reaction is harm-
ful and sometimes more annoying
than constipation. They in no way
effect a cure and their tendency is to
weaken the already weak organs with
which they come in contact.

We honestly believe that we have
the best constipation treatment ever
devised. Our faith in it is so strong
that we sell it on the positive guaran-
tee that it should not cost the user a
cent if it does not give entire satis-
faction. This preparation is called
Rexall Orderlies. These are prompt,
soothing, and most effective in ac-
tion. They are made of a recent
chemical discovery. Their principal
ingredient is odorless, tasteless, and
colorless. Combined with other well-
known ingredients, long established
for their usefulness in the treatment
of constipation, it forms a tablet
which is eaten just like candy. They
may be taken at any time, either day
or night, without fear of their caus-
ing any inconvenience whatever. They
do not gripe, purge, nor cause nausea.
They are ideal for children, weak,
delicate persons, and aged people, as
well as for the most healthy person.

They come in three size packages,
12 tablets, 10 cents; 36 tablets, 25
cents; 80 tablets, 50 cents. Remember
you can obtain them at our store—
The Rexall Store, Carroll's Drug
Store, 623 Fallowfield Avenue, Char-
leroi, Pa.

FOUR FLEA POWER OF WATCH

Delicate Little Instrument Whose Balance Wheel Is Driven More Than 3,500 Miles a Year.

Few pieces of machinery show more wonderful features than that of the watch. As a general proposition it may be stated that a watch is the smallest, most delicate instrument of the same number of parts that has ever been devised.

About 175 different pieces of material enter into its construction and upward of 2,000 separate operations are comprised in its manufacture. Certain of the facts connected with its performance are almost incredible when considered as a whole.

A blacksmith strikes several hundred blows on his anvil in a day and as a matter of course is glad when Sunday comes, but the roller jewel of a watch makes every day—and day after day—432,000 impacts against the fork, or 157,680 blows during the course of a year without stop or rest—or some 3,153,600 blows during the space of twenty years, the period for which a watch is usually guaranteed to keep good time.

But the wonder of it does not cease here says the Michigan Manufacturer. It has been calculated that the power that moves the watch is equivalent to only four times the force used in a flea's jump. The watch power is therefore what might be termed the equivalent of a four flea-power. One horse-power would suffice to operate 170,000,000 watches.

Furthermore the balance wheel of a watch is moved but only 1,433 times a year. It is estimated that the balance wheel of a watch is moved but only 1,433 times a year. It is estimated that the balance wheel of a watch is moved but only 1,433 times a year.

PAY FOR THE FRENCH NAMES

Fastidious Restaurant Patrons Could Get Same Dishes in "American" for Much Less.

Frank P. Ward, writing for Harper's Weekly, declares that the men who cater to the hunger and thirst of the wealthy in New York make a profit of anything up to 300 per cent. For this condition he blames one class of restaurant patrons whom he describes as "persons who turn up their noses at eggs with grated cheese, 25 cents, but go into ecstasies over omelets a la reine, \$1—exactly the same dish." To descend a little in the scale, says Mr. Ward, "beef and" establishments are highly profitable; a fact which, as he points out, goes to show that if these can coin money at five and ten cents a "throw," the others can do better. There is undeniably a deal of sound sense in Mr. Ward's arraignment of ultra-fastidious persons who ecstatically pay 25 cents for food and 75 cents additional for a French name to go with it. The person of that temperament is evidently convinced that grub by a more genteel name would taste as sweet, and is determined to eat it by the other name, cost what it may. Why eat "vittles" when, by merely paying a quadruple price, one may have nouriture? Why, indeed! If French names for Yankee dishes serve best to keep in circulation the money of the final rich, by all means put them up in French.—Manchester Union

He Eats No Corn.
"I am deeply fond of corn on the cob," said the mathematician, "but I haven't eaten any this season."

"What's the matter? It doesn't cost much."

"Well, that all depends upon how you look at it. Take it in the market, it's cheap enough, twenty-five or thirty cents a dozen ears. But I have to eat in restaurants, and there I would have to pay ten cents an ear or \$1.20 a dozen for it. Now, where do you suppose the restaurants get the courage to charge that much for serving hot what costs them only one-fourth that much in the raw state? If the corn were difficult of preparation for the table, if it took much trouble in the cooking or if it required elaborate sauces it would be different. But corn on the cob is the simplest thing a restaurant can serve, and for one, I don't propose to let them make any 300 per cent. profit out of me on their old corn."

Shakespeare In 1793.
What, we wonder, would happen to the London manager nowadays who should dare to put on the stage such a version of a Shakespearean tragedy as was played in Ireland a hundred years ago? Mrs. Earle in her book, "Memoirs and Memories," gives a Dublin play bill in 1793, which is worth quoting.

The play was "the tragedy of Hamlet," originally written and composed by the celebrated Dan Hayes of Limerick and inserted in Shakespeare's works." The title role is taken by a gentleman "who between the acts will perform several solos on the patent bagpipe, which performs two tunes at the same time."

Double Action.
Young Hopeful—Father, what is a traitor in politics?

Veteran Politician—A traitor is a man who leaves our party and goes over to the other one.

Young Hopeful—Well, then, what is a man who leaves his party and comes over to yours?

Veteran Politician—A convert, my son.—Tyt-Ritu

TO TUNNEL ENGLISH CHANNEL

Scheme Is Being Revived in Spite of Refusal to Pass Last Bill.

The scheme for a tunnel between England and France is being revived in spite of the emphatic refusal of the last bill which was presented in 1907. But great changes have been brought about since then in relation to the military opposition to the scheme, for the coming of the aeroplane and its rapid development as an implement of war have to some extent removed the idea of danger from invasion by tunnel.

If 11 aeroplanes can cross the channel together, as they did a few weeks ago, there is little reason why an army of them may not do so in the near future if they wished. A tunnel also might under certain circumstances be a help in time of war rather than a danger, as much of our food supply could be brought through it.

The chief advantage, however, of the tunnel would be an increase of trade and tourist traffic between England and France as well as countries beyond France. At present the borings at each side are well over a mile and it is estimated that the whole work could be completed within five years, as there is no hard rock to be pierced. The adoption of electricity instead of steam would also remove one of the original drawbacks.

Found in the Census Bulletin.

A rather startling feature of one of the recent census bulletins is that concerning mortality with reference to women. Dr. Cressy L. Wilbur, chief statistician of vital statistics, declares that out of all the deaths reported for the age periods from 10 to 24 and 25 to 44 years 29.3 per cent. of them are due to tuberculosis of the lungs. Of the deaths among women workers between the ages of 35 and 44 years heart disease claims an average of 14.49 per cent. The bulletin also shows that between the ages of 35 and 64 6.8 per cent. of the deaths among women is due to cancer, and it also states that of the total number of deaths among women of specified occupation by far the largest per cent. is due to consumption.

Render Unto Caesar—

The agent of a recently completed large New York apartment house had a card placed in all the passenger elevators bearing this notice: "Gentlemen will remove their hats when there are ladies in the car." The cards were taken down after a few days, but there seems to be a difference of opinion as to the reason. The agent says that his aim has been accomplished, while some of the tenants said that he was willing to let the matter of the hats take care of itself after he had read a letter signed by a number of tenants protesting against his "mentorship." "If you want us to take off our hats to anybody let the order come from the janitor," they wrote. "He's the janitor, but you are only the agent."

The Key to Power.

No one has ever reached the limits of the personal power that his own life may have. Here is the glory and the challenge of the spiritual life. Physical health and power has its limitations and its ending; when one has attained to a certain degree here the best that he can hope to do is to maintain it for a few years and then to see it drop away from him. Not so spiritual health and power. It can increase up to the day of one's death—and then be released to greater things. The theme of stirring thought is this: "The always multiplying power of obedience to God's will." What a dynamic thought to lodge in the lives of those who are at the threshold of mature life! If we would put an end to personal power, disobedience pushes the limitations of power ever farther away.

Bottomless Bottle.

In order to overcome the difficulty of cleansing a milk bottle thoroughly, says the Scientific American, a "bottomless bottle" has recently been invented. The device consists of a tube formed like a bottle, but open at each end, so that all parts of the interior are readily accessible. When the bottle is to be used, a paraffin paper disk is fitted into the larger end of the tube to serve as a bottom, and is held securely by means of stiff spring metal strips. After the bottle has been filled it is closed in the usual way by means of a paraffined paper cap. The caps and bottoms, being made of paper, may be discarded after use and new ones may be employed with every fresh use of the bottle.

Eccentric Work Basket.

There are workbags made of turtles. Could anything be odder? And yet they are not unattractive, queer as they sound. The shell of the turtle is lined with some gay silk, and the tail is pulled over and inserted in the mouth, then used as a handle. They make nice sewing baskets, and will undoubtedly appeal to the lovers of the eccentric.

Hard to Live Up To.

An example of greatness thrust upon one is an eleven-year-old boy living in Hamilton avenue, Yonkers. His name is George Washington. He was born on Christmas day and christened on Easter. The lad sings in the choir of St. Andrew's Memorial church.

WOMAN'S LONG BUGGY RIDE

Mrs. Sarah Conner With Four Children Drives 900 Miles in Six Weeks.

A strenuous overland journey has just been completed by Mrs. Sarah Conner and her four small children, who after a trip in a dilapidated buggy of 900 miles have arrived at Wheeler, S. D., their destination.

Mrs. Conner and her children commenced their journey at Moose Jaw, Canada, following the death of her husband, who left them in a destitute condition. Their nearest relative resided at Wheeler, in South Dakota.

A span of ponies were hitched to a single seated top buggy which contained the mother and her four children, one a girl of eleven, a boy of nine, a girl of seven and a baby of eighteen months. In the old buggy were piled the worldly possessions of the family.

The journey required six weeks' time. Some days they were unable to travel more than fifteen miles. The two older children and part of the time three of them walked while the mother drove. The ponies had only such grazing as they could find along the road and were without grain the entire trip. They were exhausted at the end of the journey.—St. Paul Falls correspondence, Minneapolis Journal

Names in Electricity.

Electricity is the one branch of science that honors the great names in its fundamental terminology. Two years ago a tablet was unveiled at Ampere, N. J., in honor of Andre Marie Ampere, the French physicist who first measured the current and for whom the unit is named. The ohm bears the name of George S. Ohm, a German man of science who discovered the law on which the unit of electrical resistance is based. The volt is named for the Italian Volta, the greatest electrical authority of the eighteenth century, who was the first man to construct a rude electric battery. A farad, the unit of electrical capacity, is named in honor of the English physicist, Faraday; the coulomb, the unit of quantity, for the French physicist Coulomb, and the watt, the unit of power, for James Watt, the Scotch inventor who improved the steam engine.

The English Cris.

Jason Blogg (of Pittsburgh)—Well, Hypatia, which of 'em have you concluded to take, the Earl of Oldpark or the Count Appoggiatura? Miss Hypatia—I'm going to await developments. pop. If the Earl loses his veto, maybe I'll take the Count.—London Punch.

That Settled Bump.

Mr. Woggs—"I'm through with Bump. I told him we were going to name our baby after some great personage, and asked him for a suggestion." Mr. Woggs—"What did he say?" Mr. Woggs—"He said: 'Name it after ours.'"—Puck.

Real Spice of Life.

If one's heart rubs only against books it gets rusty and dry. We need to magnetize our hearts with living hearts and real feelings. Break bread often with common people.—H. W. Beecher.

New Swimming Machine.

Providing a cork jacket, which keeps its wearer upright in the water, with a propeller, driven by two cranks, a New Yorker has invented a device which is a variation from most styles of swimming machines.

Large Irrigation Project.

An eight million dollar irrigation project, about being completed in New South Wales, will benefit 1,600,000 acres of land and offer settlement opportunities to 70,000 persons.

Higher Up.

"He seems to be quite a big man in politics now. I suppose he has got over his old habit of stooping for bribes?" "Oh, yes. They hand them up to him now."—Puck.

OLD MOSES MAKE MISTAKE?

First Chapter of Genesis Confirms in Many Instances With Late Discoveries in Science.

We have often heard "the mistakes of Moses" in the first chapter of Genesis commented upon, but what especially strikes us in that chapter is not its contraventions of science, but its harmonies with late discoveries. How did the writer, many centuries before the story of the rocks had been deciphered, know that there was a beginning and then a pause before life appeared on the earth? Who taught the writer that the earth was "without form and void" before it was divided into continents? How came it that the long delayed, slow emergence of land should be set forth as it is? Was it mere guesswork that prompted the writer to say grasses were created before animals, and not for animals already existent? Is it a happy accident that life in the water appears before life upon the land? And ages before the scientist dreamed of paleontology we find man last in the series just as he appears today by his remains in the drift instead of in the stratified rocks? Further investigation may explain discrepancies, but what except inspiration can account for these coincidences?—The Advance.

Salt a Luxury.

In some parts of Africa children will eat salt in preference to sugar. On the gold coast a handful of salt will purchase two slaves.

Enough of That.

A man is never old enough to know enough not to marry a girl who is young enough to be his granddaughter.

Home of Governors.

The Louisville Courier-Journal says Kentucky has furnished to other states 106 governors.

Sculptor Receives Decoration.

Albert Jaegers, the sculptor of the Baron von Steuben statue, which was recently presented by the United States to Germany, has been decorated with the Order of the Eagle, fourth class, in recognition of his merit. He was born in Elberfeld, Germany, in 1868, obtaining his education in the public schools. Without wealth or influential friends he worked away in the face of many discouraging features, until, self-taught in art, he arrived at the point where his creations commanded recognition. He came to this country several years ago to make his home, and he has an attractive place at Suffern, New York.

For Women Who Care

Of course you use an antiseptic in your family and in the care of your own person, and you want the best.

Instead of what you have been using such as liquid or tablet antiseptics or peroxide, won't you please try Paxtine, a concentrated antiseptic powder to be dissolved in water as needed.

Paxtine is more economical, more cleansing, more germicidal and more healing than anything you ever used.

Paxtine
ANTISEPTIC

In the toilet—to cleanse and whiten the teeth, remove tartar and prevent decay. To disinfect the mouth, destroy disease germs, and purify the breath. To keep artificial teeth and bridgework clean and odorless. To remove nicotine from the teeth and purify the breath after smoking. To eradicate perspiration odors by sponge bathing.

As a medicinal agent for local treatment of feminine ills where pelvic catarrh, inflammation and ulceration exist, nothing equals hot douches of Paxtine. For ten years the Lydia E. Pinkham Med. Co. has been regularly advising their patients to use it because of its extraordinary cleansing, healing and germicidal power. For this purpose alone Paxtine is worth its weight in gold. Also for nasal catarrh, sore throat, inflamed eyes, cuts and wounds. All druggists, 25 and 50 cents a box. Trial box and testimony of 31 women free on request. THE PAXTON TOILET CO., BOSTON, MASS.

MOTHER WAS WORRIED

Because Young Daughter Coughed So Much—What She Did.

Just think how anxious Mrs. William Archer, of Long Branch, N. J., must have been about her 14-year-old daughter. She says: "She was very thin, had a bad cough, was nervous and did not sleep well. Vinol has helped her wonderfully. She can sleep all night now without coughing once, in fact her cough is gone. Her appetite is greatly improved and she has gained weight. I wish every mother knew what Vinol will do for delicate children."

Nothing can possibly be more important than the health of children and that is why we earnestly advise, R or 144-W. Charleroi Phone 175-A

the use of Vinol in all cases where a child is weak, pale, run down, has a cough, or poor appetite. We have seen it make so many children strong and rosy that we believe in it. Children take Vinol eagerly because it tastes good and it puts new strength into their little bodies. We guarantee Vinol to give perfect satisfaction and give back your money if it does not. Piper Brothers, Drugists, Charleroi, Pa.

DON'T GET COLD

But Order Your Coal From MILLER & COOPER
General hauling and moving. All orders promptly attended to. We have three teams. Bell Phone 176 and that is why we earnestly advise, R or 144-W. Charleroi Phone 175-A

Persistent Advertising Brings Business Success

If the money that is spent every year by "occasional" advertisers were added up it would be found to amount to a large sum. By "occasional" advertising is meant the using of space at irregular periods in newspapers. Local publicity is often done this way under the excuse of helping the paper, but the real reason, if the advertiser could be got to admit it, is that he is half hearted about the matter. He partly looks upon advertising as a luxury anyhow and so curtails his expenditure on it to the lowest limit.

Although the retailer may regard publicity as a luxury, it yet seems to be a dream on his part that one day he will make some real success and a handsome fortune through advertising. Indeed, down deep in all retailers' hearts is a feeling that money can positively be made through advertising. They know that huge fortunes have been and are being piled up by retail merchants with the aid of this limitless force, and they have secret hopes that one day they also may strike the royal road to success. If they but knew it that road lies straight and plain before every retailer in the country if he would only open his eyes to see it.

John Wanamaker, the great New York and Philadelphia retail merchant, on one occasion said: "Advertising doesn't jerk; it pulls." It begins very gently at first, but the pull is steady. It is likened to a team pulling a heavy load. A thousand spasmodic, jerky pulls will not budge that load, while one-half the force in steady effort will start and keep it moving.

Here is the solution in a nutshell—steady effort. The merchant who uses newspaper space only "occasionally" is the one who is dissatisfied with results. It is the steady pounding—and pounding again—that makes success in advertising as in everything else. All advertising is good in proportionate degree to how it is done, and even occasional advertising has some value, but to be successful to the point of permanently increasing your bank account, it must be done persistently and systematically.

What would you say about a clerk in your store who waited on your customers for a day or two and then sat down to rest for a few more days, leaving the customers to attend to themselves? You know how long your business would last under such conditions. It is the same with newspaper advertising. Publicity in newspapers is simply salesmanship on paper, and the same rules apply to it as apply to salesmanship in your store. Continuous effort and eternal polishing up of ideas and methods are necessary to make success either as a personal salesman in your store or as a salesman in newspapers.

You advertise to sell your goods and keep your name in front of people. It is only reasonable to suppose that you will be better able to do this with persistent effort than with spasmodic attempts. If you were to tell a man or woman daily about the quality and prices of your wares you would produce more effect than if you were to talk to him or her at uncertain intervals.

The question of changing the salesmanship or "copy" in your advertising space is an important one.

Some merchants never stop to think about an ad until the big industries pay rolls around, and then they write their copy in a few minutes, when time and thought is necessary, and then "rush" it to the newspapers the day they want it to appear, and then expect immediate returns.

Advertisement constructing is a profession like medicine or law. When you are sick you go to a physician; when you get into a legal difficulty you go to a lawyer.

When your business needs a stimulant why should you not put a competent man the job, and if you do not have such a man why not get one? and if you cannot do this why not employ someone out of the store to do it? Would you keep a clerk in your employ who could not wait upon a customer in the right way? Of course you would not—Your advertising copy not only needs but requires the same discrimination.

If you give it this attention, keep at it, sell the right kinds of goods at the right prices, and live up to your advertising, there is no doubt about your ultimate success.

J. W. BERRYMAN & SON

CHARLEROI, PENNA.

Among The Passers

Johnstown fans are preparing to welcome the flag, but they aren't so dead sure of it yet. Three games above Uniontown isn't many.

Wohlfarth got a bad fall at Johnstown Saturday night, but stuck out the greater part of the game. Then Mayham went in.

There wasn't any evidence of slump at Johnstown. Every man with Charleroi got a field goal and Herron was the only eminent who didn't get more than that.

Captain Jack Adams believes his

team will be in the best of shape tonight to break the hoodoo that has recently been dogging their heels.

What a job the referee would have if Uniontown and Johnstown should tie for first place this week and they had to play an extra game.

From being up against open style of play Saturday night, Charleroi will buck up against the chief exponents of the sticking plaster game to night, Connellsville.

Swenson, who plays the Uniontown heavy, according to some of the dope-

sters has a baseball future that is worth considering. "Swens" keeps himself in good condition always, and at present is an excellent pitcher.

CENTRAL BASKETBALL LEAGUE

Saturday Night's Results.

To Mothers—And Others.

You can use Bucklen's Arnica Salve to cure children of eczema, rashes, teeter, chafings, scaly and crusted humors, as well as their accidental injuries—cuts, burns, bruises, etc., with perfect safety. Nothing else heals so quickly. For boils, ulcers, old running or fever sores or piles it has no equal. 25 cents at W. F. Hennings.

HOT GAME IS WON BY THE JAWNS

Charleroi Loses in 47-40
Struggle at Johnstown

TEAM WORK IS FEATURE

Basketball fans who journeyed to the Johnstown Casino Saturday night were treated to one of the most engrossing games of basketball that has been played on that floor this season. Charleroi appeared, and although defeated finally by Fogarty and his tribe, made the Floods show all the form of which they were capable. The bell tolled as Adams threw in his sixth field goal, ending the game 47 to 40.

Able witnesses, who in their sober moments wouldn't be given to telling dreamy tales, say it was a clean cut battle. Picturesque passing was a feature and team work was as good as new on both sides. Charleroi ended the first half but two points behind Johnstown. The score was 22 to 20.

Newman was the boss scoring machine with Captain Jack Adams next. J. Brown pulled off the only spectacular play, when he shot the ball half the length of the floor for a basket. Lineup:

Johnstown 17 Charleroi 40
Fogarty.....F..... Adams
Newman.....F..... J. Brown
Keenan.....C..... Dolin
Wohlfarth-Mayham G..... A. Brown
Kinkade.....G..... Herron
Field goals—Fogarty, Newman 9, Keenan 2, Wohlfarth 4, Kinkade, Adams 6, J. Brown 3, Dolin 3, A. Brown 2, Herron. Foulgoals—Fogarty, 13 out of 19; Adams, 10 out of 16. Referee—Roach.

LOCAL MENTION

John Chalfant a student at W. and J. college at Washington, was here Saturday to visit friends.

Miss Edna Shearer and Fred Shearer of near Fayette City, were guests Sunday at the home of Mr. and Mrs. J. L. Reeves of Fallowfield avenue.

Rev. W. D. Fries is a Pittsburgh visitor today.

Miss Ethel and Mildred Nieman, of Uniontown were Sunday visitors with friends in Charleroi.

William Vetter and Ellsworth Riggs visited friends in Uniontown over Sunday.

Miss Helen Michener went to Monongahela Sunday to visit at the home of Mrs. J. A. Crawford.

Mr. and Mrs. J. A. Crawford and son Willie of Monongahela were Sunday guests of Mr. and Mrs. J. E. Michener, of Seventh street.

Ralph Richards, of Pittsburgh visited his brother, C. B. Richards, Sunday.

J. L. Reeves and family are today moving from 335 Fallowfield avenue to the new home built for them this winter on Fallowfield avenue near Third street. Lawrence B. Frye, the undertaker will occupy the house from which they moved.

SUFFERS FROM AN ATTACK OF FEVER

Word has been received from Tiffin, Ohio to the effect that Rev. C. E. Frontz, late pastor of Christ Lutheran church, of Charleroi who went to Tiffin as pastor of the Lutheran church the first of the year, is seriously ill of typhoid fever. Rev. Frontz will be unable to occupy his pulpit for several weeks according to the statement of the physicians attending him.

Root and Herb Remedies stand the test of time because they possess merit and though many years have passed since our American grandmothers commenced to make their annual collections of roots, herbs and barks, from which to prepare medicine to relieve different ailments science has failed to produce other remedies so dependable.

Many of these old recipes which our ancestors found so reliable have developed into proprietary medicines or world-wide reputation, such as Lydia E. Pinkham's Vegetable Compound the most successful remedy for woman's ills the world has ever known, and tons of roots and herbs are used annually in making it.

COMMISSION DOWN TO WORK AT HARRISBURG

James Oates, lately elected to serve on a committee of the five coal mining district of the State in relation to framing an employers' liability bill to be presented at the next session of the Legislature, returned from Harrisburg Saturday night. While at the State Capital, the committee interviewed Governor Tener, relative to a compensation law, and in answer to a question by the committee the Governor said it would be one of the proudest moments of his life to sign a compensation bill, which he hoped to have the pleasure of doing in 1913.

The committee was very well pleased with the reception accorded them by the State officials with whom they had business and are enthusiastic in their praise of Governor Tener for the assurance he gave them of his devoted interest in the State having as good if not better compensation law than any other State in the Union. The committee also interviewed United States Senator Penrose. The Senator stated to the committee that he considered the passage of the act, giving the Governor power to appoint a committee to present to the next Legislature a compensation bill, was a very wise one, and that he would assist and do all in his power to pass such an act at the next session of the Legislature.

Mr. Oates states that the committee was more than pleased with many assurances received, that the next Legislature will place upon the statute books a very good liability and compensation law. The members have received copies of several other States' laws and have secured data from the different State officials from which they will gather the best so that there won't be much trouble to present to the next Assembly a clear and concise bill that will meet with the approval of a large majority of the Legislators and the people of Pennsylvania.

QUESTION IN NAME

(Continued from first page.)

primary ballot, which would consequently become a cumbersome and unwieldy document.

Within a few days the Roosevelt delegate candidates, it is understood, will demand a ruling or will go into court and endeavor through a mandamus proceeding to secure an immediate ruling. The same situation exists in every county in the State as here, and candidates for delegate everywhere are asking that something definite be determined, in the placing of the present candidates' names after the names of the State delegate candidates on the primary ballot.

MORE THAN SKIN DEEP

More than a Skin Salve is Needed to Cure Piles Permanently. Don't be disappointed if you fail to get a lasting cure of piles with salves. The cause of piles is more than skin deep. It is sluggish, flabby veins—pockets filled with thick, bad blood.

HEM-ROID, a tablet tonic remedy is taken inwardly, acts on the circulation and cures all kinds of piles thoroughly.

WILL STAY OUT MONTH

Chamouni Miners Take Action on Strike Question

AWAITING THE RESULT

Crescent Diggers May Go Out if Some Settlement is Not Effected Soon

Miners of the Chamouni mine of the Monongahela River Consolidated Coal and Coke company, who went on strike the first of last week because of contentions over the use of safety lamps, will stand out until the present contract expires the end of this month. At the Crescent mines where 1,000 miners are employed, the same trouble exists. At a meeting of the miners of the latter mine Sunday action was taken to continue working until Wednesday, when if something definite is not accomplished, there will probably follow a general strike.

Miners of the Chamouni mine held a meeting Sunday. Besides taking action to stand out until the contract expires, March 31, it was decided to take up the matter with the National Executive Board. An appeal will be formulated also to this board. District officials will be asked to aid in securing peace. The action is nearly identical with that taken at a separate meeting by the Crescent miners.

The miners claim that the use of the open lamp is not allowed in cutting pillars and stumps, but that the electrical machines are. They contend that the electrical machines throw off sparks and make working as dangerous as though the open lamp were used. In addition the use of the safety lamps, which are awkward to handle they say decreases their earning power considerably.

What the miners want is the removal of the electrical machines in the dangerous places, or where they are used that open lights be permitted.

CONNELLSVILLE TO PLAY THEIR LAST TONIGHT

Connellsville, headed by Captain Dark, will appear on the Charleroi basketball floor for the last time of the season tonight. Connellsville has been putting up a fast game recently defeating Uniontown, and Johnstown with astonishing regularity. Captain Jack Adams is confident that the hoodoo which has been pursuing Charleroi for the last eight games will be broken tonight. He says that although many hard battles have been fought recently, the team is not now in as bad condition as it might be. Both tonight's game and Friday's game, the last of the season will be "Boosters."

Sent to Home.

William H. Smiley of Fallowfield township was taken to the county home at Arden today and it is expected that he will be recommitted to the Polk home for the Feeble Minded.

Chestnut Blight in The State

Commission at Work to Prevent Heavy Destruction—This County Suffers

Prompt measures are being taken by the State Chestnut Tree Blight Commission to save chestnut trees in Western Pennsylvania counties, where the blight has been found to exist. When the inspection of chestnut trees was first started it was believed that the blight would be confined to the section east of the Allegheny mountains. Inspectors lately have discovered that evidence of the blight has been found in Washington, Fayette and Somerset counties, although generally in very isolated instances. There was no general discovery of the disease except in one instance which occurred in Washington county. In this case 83 trees were found infected by blight and every one was cut down and the infected portions burned.

STRIKE ON AT JUMBO

Miners of Pittsburg Coal Company at McDonald Quit

OPPOSE LOCKED LAMPS

A strike of serious proportions was declared Friday by the miners employed at the Jumbo mine of the Pittsburg Coal company on the Panhandle road near McDonald. About 800 men are affected.

The Coal company has nothing to say about the trouble, but it is understood that the trouble arose over the order of the superintendent, Leonard Sarver, that the cutters in the mine equip themselves with locked safety lamps. It is not known whether or not this order came from one of the mine inspectors, but it is assumed that it did, and that the superintendent was simply obeying the orders of the mine inspector.

The cutters who use an electric cutting machine, object to the use of the locked lamps. Miners do not like to use these lights unless they are compelled to do so. They do not give so good a light, they say as the open mining light, and are more difficult to take care of. Miners take the view that in an electrically operated mine that a locked safety lamp is not needed and if they are forced to use them in a mine, it means the abandonment of the electrical operation of the mine.

The Jumbo mine is electrically equipped, the Pittsburg Coal company having spent many thousands of dollars in improving the mine with electrical equipment. Where electric cutting machines are used there is an almost continuous flash and sparkle during their operation, and the miners insist that there is no need for the safety lamp if the mine is safe enough to use the electric cutting machine, which is, in their contention, as dangerous as an open light where a mine is gaseous.

LIONESS TERRORIZES COUNTY SEAT FOLKS

Tawny Brute Drops From Baggage Car to Station Platform and Starts on Tour of Investigation

Washington, the staid old county seat, had a real and genuine lion hunt Sunday. A full grown lion, or lioness, rather, roamed at large for a brief space of time, and created a veritable reign of terror in the community in which her royal highness was seen.

No one was hurt, but the number of people who were badly scared have not yet been counted. It all happened in this way. A traveling show whose outfit consists mainly of lions—seven of them—arrived in Washington from Waynesburg over the narrow gauge road. The arrival attracted the usual crowd of curiosity seekers, and when the drymen started to unload the lion cages to transfer them to a baggage car on the Pennsylvania railroad, about 100 persons had congregated. In making the transfer one of the cages was dropped, and the occupant, a magnificent lioness named Pasha, was spilled out.

That's where the "skedaddling" began, and the getaways from the cage were said to have broken all sprinting records on the W. & J. track. One of the first persons Pasha met was a negro with a bundle. The latter dropped the bundle and fled, and those who saw him are under the impression that he's running yet. The bundle happened to be a quart

bottle of whiskey, which smashed to smithereens.

The fumes did not please Pasha, who changed her course. Meeting two small children who regarded her "pretty big dog", she did not molest them. A number of other pedestrians were encountered, all of whom she seemed to ignore. Grandchildren in after years of their hairbreadth escapes. Finally Pasha began to get cold feet from her unaccustomed contact with the frozen ground, and began to look for shelter.

Spying a boiler house of an oil well near the Trinity Hall grounds, Pasha sought shelter. The boiler was in the act of shoveling coal into the furnace when she heard a grand sack of him and turned around to find himself sailing into the face of a full grown beast of the jungle. Making a headlong dive through an opposite window, the fireman also made a sprinting record.

By that time the show people were hot on the trail of the lioness and the fireman was putting distance between himself and the boiler house Marquette Smith a young girl connected with the show, went in and captured Pasha and stood guard over her until a wagon with the cage came up, and the beast was once more safely in captivity. This was one case where the female of the species did not prove more deadly of the kind.

DIES AFTER FIVE WEEKS' ILLNESS

John Jenkins, Sr., Succumbs at Hospital to Ravages of Pneumonia

WIDELY KNOWN CITIZEN

John Jenkins, Sr., aged 63 years, one of the best known residents of the Monongahela valley, died Saturday afternoon at 4:30 o'clock at the Memorial hospital, Monongahela. Death was due directly to pneumonia. Mr. Jenkins had been in the hospital for five weeks, having undergone an operation. The funeral will be held Tuesday morning at 10:30 o'clock with services at 1343 Victory street, Pittsburg. The body will be brought to Monongahela for interment in the Monongahela cemetery.

Mr. Jenkins was born in Airdia, Scotland, May 18, 1849. When he was four years old his father and mother, Mr. and Mrs. James Jenkins, brought him to Monongahela. His father entered the coal business and among other works started the New Eagle mine, under the firm name of Jenkins, Nish and Co. The son did not continue in the coal trade however but embarked in the hotel business, in which he continued until shortly before his death.

Mr. Jenkins first marriage occurred in 1869, and the following children survive, James O., of Elizabeth, John, of Charleroi, Robert L., of Monongahela; Mrs. O. B. Lynch, of Elizabeth, Miss Ida Jenkins and Mrs. Sarah Wright, of Finleyville. His first wife died September 22, 1888 and he was married to Josephine Kirby, of Pittsburg, who still survives.

Two brothers and three sisters also survive. They are Daniel Jenkins of McKeesport, Robert Jenkins, of Elizabeth, Mrs. Mary Dinsmore, of Greensburg, Mrs. Margaret Neco, of Wilkesburg, and Mrs. George Crawford of McKeesport.

Mr. Jenkins was employed prior to his last illness as a clerk at the Glasser Hotel in Monongahela. He lived for years in and about Monongahela, where many friends mourn him.

CHRISTMAS CLUB

The Charleroi Savings and Trust Company Offers Easy Plan to Provide Money for Christmas

Everybody needs money for Christmas. Many people have trouble in providing a sufficient amount to buy all the presents needed when the time comes. The Charleroi Savings and Trust company of this city offers an easy plan to meet such a contingency. On April 1st it will start a Christmas Savings Club. Members will pay in a small amount each week for thirty-six weeks and at the end of that time will receive checks for the total amounts they have paid in plus an additional 3 per cent interest. The plan is simple and systematic. There will be different classes of members. For instance, the first class will start in by paying one cent the first week, two cents the second week, three cents the third week and so on for thirty-six weeks the last week's payment amounting to thirty-six cents. Members in this class will receive checks two weeks before Christmas for \$6.66 with interest. There will also be classes starting with two cents and five cents. Payments must be made promptly every week or in advance for as many weeks as may be convenient.

It will not only prove beneficial to grown people but will prove very popular with young people. It is very simple and the details are easily understood when explained. Everybody is welcome to join and the Charleroi Savings and Trust company will be pleased to have those interested call and learn all about it. Those desiring to become members can join after April 1, 1912. The club will be open for subscription for two weeks only.

May Beseech Council to Investigate

Citizens to Appear Before Borough Fathers Regarding Court Case

A delegation of citizens have arranged to meet with council tomorrow night in order to further consider a case from Charleroi that came before the grand jury at the last session of the court. The case involves the morals of the community. This was the case where three young fellows were arrested for an offense against morality. Two of the youths confessed and were sentenced to Huntington reformatory, while the other case was not prosecuted. It is stated without the consent of the private prosecutor. As there were eight others implicated in the offense, and all but the three skipped out to avoid arrest at the time, many citizens feel that the case should not have been dropped.

The delegation will meet first at the burgess' office at 8 o'clock and will proceed to the council chamber, where they expect to ask the aid of council and the borough officials in a further effort to reopen the case in order to protect the community from a repetition of the offense.

WILL TAKE UP SCALE

Miners' Committee and Operators' Committee to Meet at Chicago

TO RENEW CONTRACT

Representatives of miners and operators in the Pittsburg District, as well as the bituminous districts throughout the United States, will meet in Chicago tomorrow to make arrangements for a second joint wage conference before the expiration of present contracts on March 31. This announcement was made at Indianapolis Saturday by John P. White, President of the United Mine Workers of America, who had just returned from the anthracite wage conference in New York.

The 250,000 bituminous union miners of the United States are demanding a seven hour work day, with five hours on Saturdays and an approximate general increase of 20 per cent in wages. At the previous conference in Indianapolis the operators flatly refused to consider the miners' demands and presented counter proposals calling for a longer work day and a wage decrease.

President White in his office at Indianapolis refused to discuss the probability of a strike that will tie up the coal mining industry in the United States similar to the present nation-wide suspension of a work in Great Britain. He also refused to comment in any way on the coming conference.

QUESTION IN NAME

Should Presidential Candidate be Given Preference?

IS COMPLICATED AFFAIR

Candidates for Delegate at Sea on Ballot Matter in This and Other Counties

Through a misunderstanding the Mail was in error when it announced Saturday that County Controller John H. Moffitt of Charleroi, and J. Olan Yarnall of California, were Roosevelt candidates for delegate to the National Republican convention at Chicago from the Twenty-fourth Congressional district. Both have announced as Roosevelt candidates for delegate to the State convention, instead of the National convention. The ranks of Roosevelt candidates for State delegate have been augmented by the names of Theodore Landefeld of Monongahela, and Attorney Julius P. Miller of Washington, who filed their petitions Saturday, with a request that the words that they will support Roosevelt for President be printed below their names on the official primary ballot. So far as known, Attorney Owen C. Underwood of Washington, is the only Roosevelt candidate to announce in Washington county for the election of State National delegate. Attorney James P. Eagleson is supposed to be a candidate in the interest of President Taft.

It is stated that thus far Isaac W. Baum, solicitor for the county commissioners, has refrained from ruling on the petitions of candidates for State delegate, to have the name of the man whom they will support for president, place after their names on the primary ballot. There is a difference of opinion regarding the meaning of the Act of Assembly regarding the placing of the name of the candidate whom any delegate will support in the convention, after the delegate candidate's name. The Act reads:

"Each candidate for delegate shall have the right, by filing a request with the county commissioners, to have printed at the right of his name upon the official ballot, in the space provided for that purpose, the name of the candidate whom he will support in the convention."

The interpretation of the Act hinges on the meaning of the word "support" in the law. The Roosevelt delegate candidates assert that the law means the name of the presidential candidate whom they favor. Some attorneys argue that it refers to the 12 delegates-at-large whom the delegate will vote for in convention and who in turn will vote for a presidential candidate at the national convention. Should the latter interpretation be ruled as the proper one, then it would mean that each candidate for delegate to the state convention would perforce have the 12 names of candidates for delegate-at-large placed after his name on the

CONSULTING THE PEOPLE.

President Taft has taken the ini-
tiative in a movement to bring busi-
ness men of the country into touch
with the Government for advice and
counsel in the administration of laws,
the enactment of new statutes and
the development of commerce. He
has called a convention of delegates
from commercial organizations in all
parts of the country to meet in
Washington on April 15, for discus-
sion and to plan the organization.
Invitations have been sent to 1,000
local chambers of commerce, boards
of trade and other commercial bodies.
Responses to the announcements of
the tentative plan have been such
that President Taft is convinced the
time is ripe for putting the proposal
to the test of practical experiment.

Hitherto it has usually been the
special interests that have been con-
sulted by the National administra-
tion. These interests that had af-
fects away to be affected by Nation-
al policies and action were invariably
on hand to press their claims. These,
being active, while the people gen-
erally were indifferent, as a matter
of course got the most consideration.
It is to offset this influence that
President Taft has called the dis-
interested business men into consulta-
tion. He has no ones to
grind, and to confer with them on the
general needs of the country. This
is a most excellent move, and dem-
onstrates President Taft's desire

to administer to the general welfare
of the public rather than to the spe-
cial interests.

PROGRESS IN ROADS.

The coming season promises to
bring great progress in road build-
ing that will materially affect Char-
leroi. With what the county and
State are likely to construct this sea-
son connections will be made with
outlying sections of country that
should have a material effect in pro-
moting intercourse with the country
distinctly and extending trade rela-
tions with the same.

In all probability direct commu-
nications will be made between Char-
leroi and Monongahela on the north
and between at least Speers on the
south, and possibly as far as Roscoe
or California in that direction on the
State highways, while the extension
of one of the routes through Char-
leroi to the Maple Creek road will
result in the paving of Lincoln av-
enue in the borough. This, with the
connection the county is building at
the end of the Maple Creek road to
connect with the old National pike,
will give direct communication by
improved roads to the county seat.

These are the improvements that
are looked for in this section this
year, and if they all materialize, it
will be a great help to the practice
and standing of Charleroi, as well
as every other town along the valley.

ELECTRIC SPARKS

The Congressional Record is in a
similar position to the houn' dog of
Champ Clark fame.

Small men have the advantage
after all. At least an advertisement
in a city paper informs its readers
that for small size men, the price
of clothing is correspondingly less
than for big fellows.

Some people think it wouldn't be
worth while being vice president of
the United States because there
isn't much chance for promotion.

A la Mode.

Milady wears a sealskin coat.
Her muff of mink is also there:
A fur hat trimmed with nanny goat—
Her ankles and her neck are bare.
—Youngstown Telegram

Milord affects a fur coat, too.
And proudly thinks: "I'm there!"
A wintry wind goes whistling thru
His summer underwear.
—Johnstown Democrat.

A pupil in the New York Common
schools was absolved of the charge
of truancy because he had to shave
three times a week. It is a fitting
vindication of whiskers.

A man may not get the benefit of
many birthdays, but look at the glory
he has out of being born on leap
year day.

Most any State and sometimes the
Y. M. C. A. can produce great men.
For the latter, look at Dr. Sun Yat
Sen.

A seat in a city street car is such
a rare thing that the average man
simply cannot refrain from hanging
on to it.

The bad little boys in this old town
Are always pullin' my sausage down;
I don't care if it was a houn'
They gotta quit pullin' my sausage
down.
—Philadelphia Star.

The spring hero is the big leaguer
leaving for his southern training
camp.

"Child's plea moves Taft," reads a
headline. Which prompts an ex-
change to remark that taking it lit-
erally it must have been some plea.

A Cure for the Blues.
What! Moping just because the skies
Are dull and dark, and gray?
Dejected, lone faced just because
The rain beats down today?
Why, bless you, child! It doesn't help
To let the tears drip, too.
Just wipe your eyes and look around
For some good work to do.

There's nothing helps when you are blue
Like helping set things right.
Kind service fills the darkest day
With sweetness and with light,
And when you're feeling out of sorts
The very wisest plan
Is to find out what others want
And help them all you can.

Some helpful thing to do:
You'll find that cheering others' lives
Will brighten life for you.
Look up the real unfortunates.
And ease their aches and pains,
And while you feel you're doing good
You'll never know it rains!

PICKED UP IN PASSING

"It takes twice as many men in
England as in the United States to
mine the same amount of coal," said
John J. Oates who is a sanita / in-
spector in the State Health Depart-
ment, and was home over Sunday
from Mercer county, where he is
operating at present. "The reason
for this is that machine mining is not
conducted in England anywhere near-
ly so extensive as in this country.
There the greater proportion is pro-
duced by pick mining.

"I first began my mining career
in the deep shafts of Yorkshire, Eng-
land where at the age of 12 years I
became a trapper boy, opening and
shutting a door that regulated the
air currents. The shaft was 500
yards or 1480 feet deep. It was ex-
tremely gaseous, but such was the
care taken that no explosion ever
occurred while I was there. We us-
ed what were called the Belgium safety
lamps, about 18 inches in height,
which had to be carried in a perfect-
ly perpendicular position, or they
would go out. These lamps were
large and awkward to handle, but I
never knew of a better one in point
of safety, unless it is the new electric
storage battery lamps that are now
being introduced."

"On account of the way the shafts
were originally constructed it is im-
possible to use the kind of mining
machines in use in the drifts in this
country, as the most of the shafts
are too small to admit the machines
in the cage. That is why there are
so many more miners in England in
proportion to the coal mined than in
this country.

The telephone bell rang. An at-
tache of the Mail office answered
and a voice over the wire informed
him that there had been a serious
explosion. It was within a few min-
utes of press time. Instantly came
the questions, tumbling over one an-
other:

"When? Where? Any damage?
Anybody killed?"
"Well I don't know," drawled the
voice over the wire. "The wind blew
up the river. Goodbye."

SEWAGE DISPOSAL MATTER UP AGAIN

(Continued from first page.)

last few weeks the State Health De-
partment has been stirring up various
towns to action on the matter of a
sewage disposal plant, and Charleroi
has not been neglected. The State
wants the borough to have plans and
specifications prepared and sent in
for approval.

As to be done with the sew-
age disposal plant at the present
time to let the contract for plans
and specifications. It is stated that
the work of drawing them up will
not be an easy task. Much time will
be consumed in their preparation.

The matter of Lincoln avenue im-
provement with State aid may also
come up for discussion. It is firmly
believed by those in close touch with
conditions that a month or at the
most two months will witness the be-
ginning of State road work through
Charleroi.

Coffins Too Small for Him.
After literally sleeping his life away
for 33 years, John Turner, Washing-
ton's giant, seven feet seven inches
tall, was hampered in death as in life
by his size, and his undertakers could
not find a coffin in all Washington
large enough to fit him. One had to
be made in Baltimore of these amaz-
ing proportions: Eight feet long, two
and a half feet wide and one and a
half feet deep.

WISE OR OTHERWISE.

Wise is the man who knows just
when not to laugh.

Free speech has enabled many a
man to give himself away.

Some things that come to those
who wait are badly worth waitin'.

The less some people are able to
annoy you the less they like it.

Some people's idea of a helping
hand is one that is lined with silver.

It sometimes happens that when a
man loses his reputation he is lucky.

The man who makes history must
be trying to encourage book agents.

Inject common sense into a love
affair and often it will die a natural
death.

If wishes were horses a lot of them
would be exchanged—for pork and
beans.

Our idea of a modest man is one
who keeps his opinions of himself
under cover.

ART OF BEING KIND.

Kindness is a quality which every
girl ought to cultivate. No matter
how pretty and fascinating a woman
may be, she is of little account unless
she has a good nature as well.

Even then the wound may remain
unhealed. The great duty of life is to
be charitable and kind in both word
and action. Remember that "kind
words are the music of the world."

They have a power which seems to
be beyond natural causes. Life is
short. We should make haste to glad-
den the world all we can by human
sympathy and love.

So many lives have been marred by
unkindness, so many hearts wounded
by sharp words or bitter retorts. Much
as we may regret a hard word we
have spoken, it is out of our power
to recall it, and all we can do is to
try and efface the memory of it by a
softer phrase.

Then and Now.

Prior to the last 15 years, by the
time people had attained their first
quarter of a century, they considered
themselves pretty much formed as to
physical and mental characteristics.
If they were ambitious and energetic
they perhaps carried on some kind
of exercise for their physical well-be-
ing, and guarded against mental de-
terioration as they advanced in years
by occasionally taking up new studies
or reviewing old ones; as a dear old
lady of my acquaintance at the age of
eighty-nine began to review her al-
gebra to keep her mind active.

Now everything is changed. We
cannot settle down comfortably in the
thought of anything in the regular

Adapted for High Altitude.

It is a familiar fact that living at
high altitude puts a strain on the
heart, which has more work to do.
In this connection, says Knowledge,
it is interesting to notice Strohl's
recent comparison of ptarmigan from
high altitudes and willow grouse from
the plains. He found that in ptarmi-
gan, even in the young bird, the right
ventricle of the heart is very dis-
tinctly stronger than in the willow
grouse, a specific adaptation to the dif-
ference of habitat.

Much In Little.

"What is your member of Congress
noted for?" "Well," answered Par-
mer Cornatssel, "around here he's
mostly noted for arguments that won't
go down and seeds that won't come
up."

Satan's Wiles.

"Satan is mighty hard to keep
ahead of," said Uncle Eben. "After
sayin', 'Git behind me, Satan,' dar's
always a terrible temptation to turn
around an' see whether he done as
you axed 'im."

If You Need Money Come To Us

The purpose of this company is to loan money to
those in need of financial assistance. Because of our
prompt service, low rates, and equitable treatment our
business is growing rapidly.

We loan in sums of \$10 and upwards, on house-
hold goods, without removal; all we ask, that you see
your way clear to pay it back in small weekly or month-
ly payments. We allow you from one month to one
year, if you need it.

All business strictly confidential, whether you make
a loan or not.

We make loans anywhere within 20 miles of Char-
leroi.

We are open Evenings until 8 O'clock

American Loan Company
2nd Floor Daily Mail Building

211 Fifth St. Bell Phone—42-R Charleroi, Pa.

HARRY COULSON IS SEVERELY BURNED

Harry Coulson, a well known young
man of Donora and a brother of
"Bob" Coulson, the Brooklyn Nation-
al league outfielder, was severely
burned about the face while at work
in the Donora steel mill Saturday
afternoon. He was removed to his
home. It will be some weeks be-
fore he will be able to be out.

AVOID HARSH DRUGS

Many Cathartics Tend to Cause In-
jury to the Bowels.

If you are subject to constipation,
you should avoid strong drugs and
cathartics. They only give tempo-
rary relief and their reaction is harm-
ful and sometimes more annoying
than constipation. They in no way
effect a cure and their tendency is to
weaken the already weak organs with
which they come in contact.

We honestly believe that we have
the best constipation treatment ever
devised. Our faith in it is so strong
that we sell it on the positive guaran-
tee that it should not cost the user a
cent if it does not give entire satis-
faction. This preparation is called
Rexall Orderlies. These are prompt,
soothing, and most effective in ac-
tion. They are made of a recent
chemical discovery. Their principal
ingredient is odorless, tasteless, and
colorless. Combined with other well-
known ingredients, long established
for their usefulness in the treatment
of constipation, it forms a tablet
which is eaten just like candy. They
may be taken at any time, either day
or night, without fear of their caus-
ing any inconvenience whatever. They
do not grip, purge, nor cause nausea.
They are ideal for children, weak,
delicate persons, and aged people, as
well as for the most healthy person.

They come in three size packages,
12 tablets, 10 cents; 36 tablets, 25
cents; 80 tablets, 50 cents. Remember
you can obtain them at our store—
The Rexall Store, Carroll's Drug
Store, 623 Fallowfield Avenue, Char-
leroi, Pa.

FOUR FLEA POWER OF WATCH TO TUNNEL ENGLISH CHANNEL

Delicate Little Instrument Whose Balance Wheel Is Driven More Than 3,500 Miles a Year.

Few pieces of machinery show more wonderful features than that of the watch. As a general proposition it may be stated that a watch is the smallest, most delicate instrument of the same number of parts that has ever been devised.

About 175 different pieces of material enter into its construction and upward of 2,000 separate operations are comprised in its manufacture. Certain of the facts connected with its performance are almost incredible when considered as a whole.

A blacksmith strikes several hundred blows on his anvil in a day and as a matter of course is glad when Sunday comes, but the roller jewel of a watch makes every day—and day after day—432,000 impacts against the fork, or 157,630,000 blows during the course of a year without stop or rest—or some 3,153,600,000 blows during the space of twenty years, the period for which a watch is usually guaranteed to keep good time.

But the wonder of it does not cease here says the Michigan Manufacturer. It has been calculated that the power that moves the watch is equivalent to only four times the force used in a flea's jump. The watch power is therefore what might be termed the equivalent of a four flea-power. One horse power would suffice to operate 870,000,000 watches.

Furthermore the balance wheel of a watch is moved by only one flea-power 1.43 inches with perfect motion, or 3,558 1/2 miles continuously in one year. Not much oil is required to lubricate the little machine on its 3,500 mile run. It takes only one-tenth of a drop of oil to oil the entire machinery for a year's service.

PAY FOR THE FRENCH NAMES

Fastidious Restaurant Patrons Could Get Same Dishes in "American" for Much Less.

Frank P. Ward, writing for Harper's Weekly, declares that the men who cater to the hunger and thirst of the wealthy in New York make a profit of anything up to 300 per cent. For this condition he blames one class of restaurant patrons whom he describes as "persons who turn up their noses at eggs with grated cheese, 25 cents, but go into ecstasies over omelets à la reine, \$1—exactly the same dish." To descend a little in the scale, says Mr. Ward, "beef and" establishments are highly profitable; a fact which, as he points out, goes to show that if these can coin money at five and ten cents a "throw," the others can do better.

There is undeniably a deal of sound sense in Mr. Ward's arraignment of ultra-fastidious person who ecstatically pays 25 cents for food and 75 cents additional for a French name to go with it. The person of that temperament is evidently convinced that grub by a more genteel name would taste as sweet, and is determined to eat it by the other name, cost what it may. Why eat "rattles" when, by merely paying a quadruple price, one may have nouriture? Why, indeed? If French names for Yankee dishes serve best to keep in circulation the money of the fiscal rich, by all means put them up in French—Manchester Union

He Eats No Corn.

"I am deeply fond of corn on the cob," said the mathematician, "but I haven't eaten any this season."

"What's the matter? It doesn't cost much."

"Well, that all depends upon how you look at it. Take it in the market, it's cheap enough, twenty-five or thirty cents a dozen ears. But I have to eat in restaurants, and there I would have to pay ten cents an ear or \$1.20 a dozen for it. Now, where do you suppose the restaurants get the courage to charge that much for serving hot what costs them only one-fourth that much in the raw state? If the corn were difficult of preparation for the table, if it took much trouble in the cooking or if it required elaborate sauces it would be different. But corn on the cob is the simplest thing a restaurant can serve, and for one, I don't suppose to let them make any 300 per cent. profit out of me on their old corn."

Shakespeare In 1793.

What, we wonder, would happen to the London manager nowadays who should dare to put on the stage such a version of a Shakespearean tragedy as was played in Ireland a hundred years ago? Mrs. Earle in her book, "Memoirs and Memories," gives a Dublin play bill in 1793, which is worth quoting.

The play was "the tragedy of Hamlet," originally written and composed by the celebrated Dan Hayes of Limerick and inserted in Shakespeare's works. The title role is taken by a gentleman "who between the acts will perform several solos on the patent bagpipe, which performs two tunes at the same time."

Double Action.

Young Hopeful—Father, what is a traitor in politics?

Veteran Politician—A traitor is a man who leaves our party and goes over to the other one.

Young Hopeful—Well, then, what is a man who leaves his party and comes over to yours?

Veteran Politician—A convert, my son.—Tjt-Rls

Scheme Is Being Revived In Spite of Refusal to Pass Last Bill.

The scheme for a tunnel between England and France is being revived in spite of the emphatic refusal of the last bill which was presented in 1907. But great changes have been brought about since then in relation to the military opposition to the scheme, for the coming of the aeroplane and its rapid development as an implement of war have to some extent removed the idea of danger from invasion by tunnel.

If 11 aeroplanes can cross the channel together, as they did a few weeks ago, there is little reason why an army of them may not do so in the near future if they wished. A tunnel also might under certain circumstances be a help in time of war rather than a danger, as much of our food supply could be brought through it.

The chief advantage, however, of the tunnel would be an increase of trade and tourist traffic between England and France as well as countries beyond France. At present the borings at each side are well over a mile and it is estimated that the whole work could be completed within five years as there is no hard rock to be pierced. The adoption of electricity instead of steam would also remove one of the original drawbacks.

Found In the Census Bulletins.
A rather startling feature of one of the recent census bulletins is that concerning mortality with reference to women. Dr. Cressy L. Wilbur, chief statistician of vital statistics, declares that out of all the deaths reported for the age periods from 10 to 24 and 35 to 44 years 29.3 per cent. of them are due to tuberculosis of the lungs. Of the deaths among women workers between the ages of 35 and 84 years heart disease claims an average of 14.49 per cent. The bulletin also shows that between the ages of 35 and 64 68 per cent. of the deaths among women is due to cancer, and it also states that of the total number of deaths among women of specified occupation by far the largest per cent. is due to consumption.

Render Unto Caesar—

The agent of a recently completed large New York apartment house had a card placed in all the passenger elevators bearing this notice: "Gentlemen will remove their hats when there are ladies in the car." The cards were taken down after a few days, but there seems to be a difference of opinion as to the reason. The agent says that his aim has been accomplished, while some of the tenants said that he was willing to let the matter of the hats take care of itself after he had read a letter signed by a number of tenants protesting against his "mentorship." "If you want us to take off our hats to anybody let the order come from the janitor," they wrote. "He's the janitor, but you are only the agent."

The Key to Power.

No one has ever reached the limits of the personal power that his own life may have. Here is the glory and the challenge of the spiritual life. Physical health and power has its limitations and its ending; when one has attained to a certain degree here the best that he can hope to do is to maintain it for a few years and then to see it drop away from him. Not so spiritual health and power. It can increase up to the day of one's death—and then be released to greater things. The theme of stirring thought is this: "The always multiplying power of obedience to God's will." What a dynamic thought to lodge in the lives of those who are at the threshold of mature life! If we would put an end to personal power, disobedience pushes the limitations of power ever farther away.

Bottomless Bottle.

In order to overcome the difficulty of cleansing a milk bottle thoroughly, says the Scientific American, a "bottomless bottle" has recently been invented. The device consists of a tube formed like a bottle, but open at each end, so that all parts of the interior are readily accessible. When the bottle is to be used, a paraffin paper disk is fitted into the larger end of the tube to serve as a bottom, and is held securely by means of stiff spring metal strips. After the bottle has been filled it is closed in the usual way by means of a paraffined paper cap. The caps and bottoms, being made of paper, may be discarded after use and new ones may be employed with every fresh use of the bottle.

Eccentric Work Basket.

There are workbags made of turtles. Could anything be odder? And yet they are not unattractive, queer as they sound. The shell of the turtle is lined with some gay silk, and the tail is pulled over and inserted in the mouth, then used as a handle. They make nice sewing baskets, and will undoubtedly appeal to the lovers of the eccentric.

Hard to Live Up To.

An example of greatness thrust upon one is an eleven-year-old boy living in Hamilton avenue, Yonkers. His name is George Washington. He was born on Christmas day and christened on Easter. The lad sings in the choir of St. Andrew's Memorial church.

WOMAN'S LONG BUGGY RIDE

Mrs. Sarah Conner With Four Children Drives 900 Miles In Six Weeks.

A strenuous overland journey has just been completed by Mrs. Sarah Conner and her four small children, who after a trip in a dilapidated buggy of 900 miles have arrived at Wheeler, S. D., their destination.

Mrs. Conner and her children commenced their journey at Moose Jaw, Canada, following the death of her husband, who left them in a destitute condition. Their nearest relative resided at Wheeler, in South Dakota.

A span of ponies were hitched to a single seated top buggy which contained the mother and her four children, one a girl of eleven, a boy of nine, a girl of seven and a baby of eighteen months. In the old buggy were piled the worldly possessions of the family.

The journey required six weeks' time. Some days they were unable to travel more than fifteen miles. The two older children and part of the time three of them walked while the mother drove. The ponies had only such grazing as they could find along the road and were without grain the entire trip. They were exhausted at the end of the journey—St. Paul Falls correspondence, Minneapolis Journal

Names In Electricity.

Electricity is the one branch of science that honors the great names in its fundamental terminology. Two years ago a tablet was unveiled at Ampere, N. J., in honor of Andre Marie Ampere, the French physicist who first measured the current and for whom the unit is named. The ohm bears the name of George S. Ohm, a German man of science who discovered the law on which the unit of electrical resistance is based. The volt is named for the Italian Volta, the greatest electrical authority of the eighteenth century, who was the first man to construct a rude electric battery. A farad, the unit of electrical capacity, is named in honor of the English physicist, Faraday; the coulomb, the unit of quantity, for the French physicist Coulomb, and the watt, the unit of power, for James Watt, the Scotch inventor who improved the steam engine.

The English Crisis.

Jason Blogg (of Pittsburg)—Well, Hyattia, which of 'em have you concluded to take the Earl of Oldmark or the Count Appogistatura? Miss Hyattia—I'm going to wait developments pop. If the Earl loses his veto, maybe I'll take the Count.—London Punch.

That Settled Bump.

Mr. Wogges—I'm through with Bump. I told him we were going to name our baby after some great personage, and asked him for a suggestion. Mr. Wogges—"What did he say?" Mr. Wogges—"He said: 'Name it after ours.'"—Puck.

Real Spice of Life.

If one's heart rubs only against books it gets rusty and dry. We need to magnetize our hearts with living hearts and real feelings. Break bread often with common people.—H. W. Beecher

New Swimming Machine.

Providing a cork jacket, which keeps its wearer upright in the water, with a propeller, driven by two cranks, a New Yorker has invented a device which is a variation from most styles of swimming machines.

Large Irrigation Project.

An eight million dollar irrigation project, about being completed in New South Wales, will benefit 1,500,000 acres of land and offer settlement opportunities to 70,000 persons.

Higher Up.

"He seems to be quite a big man in politics now. I suppose he has got over his old habit of stooping for bribes?" "Oh, yes. They hand them up to him now."—Puck.

OLD MOSES MAKE MISTAKE?

First Chapter of Genesis Confirms in Many Instances With Late Discoveries in Science.

We have often heard "the mistakes of Moses" in the first chapter of Genesis commented upon, but what especially strikes us in that chapter is not its contraventions of science, but its harmonies with late discoveries. How did the writer, many centuries before the story of the rocks had been deciphered, know that there was a beginning and then a pause before life appeared on the earth? Who taught the writer that the earth was "without form and void" before it was divided into continents? How came it that the long delayed, slow emergence of land should be set forth as it is? Was it mere guesswork that prompted the writer to say grasses were created before animals, and not for animals already existent? Is it a happy accident that life in the water appears before life upon the land? And ages before the scientist dreamed of paleontology we find man last in the series just as he appears today by his remains in the drift instead of in the stratified rocks? Further investigation may explain discrepancies, but what except inspiration can account for these coincidences?—The Advance

Don't Laxury.

In some parts of Africa children will eat salt in preference to sugar. On the gold coast a handful of salt will purchase two slaves.

Enough of That.

A man is never old enough to know enough not to marry a girl who is young enough to be his granddaughter.

Home of Governors.

The Louisville Courier-Journal says Kentucky has furnished to other states 106 governors.

Sculptor Receives Decoration.

Albert Jaegers, the sculptor of the Baron von Steuben statue, which was recently presented by the United States to Germany, has been decorated with the Order of the Eagle, fourth class, in recognition of his merit. He was born in Elberfeld, Germany, in 1868, obtaining his education in the public schools. Without wealth or influential friends he worked away in the face of many discouraging features, until, self-taught in art, he arrived at the point where his creations commanded recognition. He came to this country several years ago to make his home, and he has an attractive place at Suffern, New York.

For Women Who Care

Of course you use an antiseptic in your family and in the care of your own person, and you want the best.

Instead of what you have been using such as liquid or tablet antiseptics or peroxide, won't you please try Paxtine, a concentrated antiseptic powder to be dissolved in water as needed.

Paxtine is more economical, more cleansing, more germicidal and more healing than anything you ever used.

In the toilet—to cleanse and whiten the teeth, remove tartar and prevent decay. To disinfect the mouth, destroy disease germs, and purify the breath. To keep artificial teeth and bridgework clean and odorless. To remove nicotine from the teeth and purify the breath after smoking. To eradicate perspiration odors by sponge bathing.

As a medicinal agent for local treatment of feminine ills where pelvic catarrh, inflammation and ulceration exist, nothing equals hot douches of Paxtine. For ten years the Lydia E. Pinkham Med. Co. has been regularly advising their patients to use it because of its extraordinary cleansing, healing and germicidal power. For this purpose alone Paxtine is worth its weight in gold. Also for nasal catarrh, sore throat, inflamed eyes, cuts and wounds. All drugs—4c, 25c and 50c a box. Trial box and testimony of 81 women free on request. THE PAXTON TOILET CO., BOSTON, MASS.

MOTHER WAS WORRIED

Because Young Daughter Coughed So Much—What She Did.

Just think how anxious Mrs. William Archer, of Long Branch, N. J., must have been about her 14-year-old daughter. She says: "She was very thin, had a bad cough, was nervous and did not sleep well. Vinol has helped her wonderfully. She can sleep all night now without coughing once, in fact her cough is gone. Her appetite is greatly improved and she has gained weight. I wish every mother knew what Vinol will do for delicate children."

Nothing can possibly be more important than the health of children and that is why we earnestly advise

the use of Vinol in all cases where a child is weak, pale, run down, has a cough, or poor appetite. We have seen it make so many children strong and rosy that we believe in it. Children take Vinol eagerly because it tastes good and it puts new strength into their little bodies. We guarantee Vinol to give perfect satisfaction and give back your money if it does not. Piper Brothers, Druggists, Charleroi, Pa.

DON'T GET COLD

But Order Your Coal From MILLER & COOPER General hauling and moving. All orders promptly attended to. We have three teams. Bell Phone 176 and that is why we earnestly advise R or 144-W. Charleroi Phone 175-A

Persistent Advertising Brings Business Success

If the money that is spent every year by "occasional" advertisers were added up it would be found to amount to a large sum. By "occasional" advertising is meant the using of space at irregular periods in newspapers. Local publicity is often done this way under the excuse of helping the paper, but the real reason, if the advertiser could be got to admit it, is that he is half-hearted about the matter. He partly looks upon advertising as a luxury anyhow and so curtails his expenditure on it to the lowest limit.

Although the retailer may regard publicity as a luxury, it yet seems to be a dream on his part that one day he will make some real success and a handsome fortune through advertising. Indeed, down deep in all retailers' hearts is a feeling that money can positively be made through advertising. They know that huge fortunes have been and are being piled up by retail merchants with the aid of this limitless force, and they have secret hopes that one day they also may strike the royal road to success. If they but knew it that road lies straight and plain before every retailer in the country if he would only open his eyes to see it.

John Wanamaker, the great New York and Philadelphia retail merchant, on one occasion said: "Advertising doesn't jerk; it pulls." It begins very gently at first, but the pull is steady. It is likened to a team pulling a heavy load. A thousand spasmodic, jerky pulls will not budge that load, while one-half the force in steady effort will start and keep it moving.

Here is the solution in a nutshell—steady effort. The merchant who uses newspaper space only "occasionally" is the one who is disappointed with results. It is the steady pounding—and pounding again—that makes success in advertising as in everything else. All advertising is good in proportionate degree to how it is done, and even occasional advertising has some value, but to be successful to the point of permanently increasing your bank account, it must be done persistently and systematically.

What would you say about a clerk in your store who waited on your customers for a day or two and then sat down to rest for a few more days, leaving the customers to attend to themselves? You know how long your business would last under such conditions. It is the same with newspaper advertising. Publicity in newspapers is simply salesmanship on paper, and the same rules apply to it as apply to salesmanship in your store. Continuous effort and eternal polishing up of ideas and methods are necessary to make success either as a personal salesman in your store or as a salesman in newspapers.

You advertise to sell your goods and keep your name in front of people. It is only reasonable to suppose that you will be better able to do this with persistent effort than with spasmodic attempts. If you were to tell a man or woman daily about the quality and prices of your wares you would produce more effect than if you were to talk to him or her at uncertain intervals.

The question of changing the salesmanship or "copy" in your advertising space is an important one. Some merchants never stop to think about an ad until the big industries pay rolls around, and then they write their copy in a few minutes, when time and thought is necessary, and then "rush" it to the newspapers the day they want it to appear, and then expect immediate returns.

Advertisement constructing is a profession like medicine or law. When you are sick you go to a physician; when you get into a legal difficulty you go to a lawyer.

When your business needs a stimulant why should you not put a competent man the job, and if you do not have such a man why not get one? and if you cannot do this why not employ someone out of the store to do it? Would you keep a clerk in your employ who could not wait upon a customer in the right way? Of course you would not—Your advertising copy not only needs but requires the same discrimination.

If you give it this attention, keep at it, sell the right kinds of goods at the right prices, and live up to your advertising, there is no doubt about your ultimate success.

Spring Coats :: and Suits ::

WE want to demonstrate to more people as we have already demonstrated to thousands, that we're in this business in a big way to meet your wishes with the greatest ease as to size, kind and color, and save you Dollars on every transaction. We have received from the makers, and are now showing, many beautiful and serviceable models in Spring Coats and Suits.

Our Spring Coats are all that could be desired in design and workmanship, embodying all the chic and smartness of the best designers of Europe and America. We have them in Serges, Whipcords and fancy Mixtures—in blues, grays and tans.

Our Suits will be a revelation to you and you will note the change in the style and fit. There are many smart models in Serges, Whipcords and Mixtures from which you should readily pick one to meet your approval.

Come and see the new assortments, learn about the prices, find out about the savings.

"Please you and save you money," that's our object

J. W. BERRYMAN & SON

CHARLEROI, PENNA.

HOT GAME IS WON BY THE JAWNS

**Charleroi Loses in 47-40
Struggle at Johnstown**

TEAM WORK IS FEATURE

Basketball fans who journeyed to the Johnstown Casino Saturday night were treated to one of the most engrossing games of basketball that has been played on that floor this season. Charleroi appeared, and although defeated finally by Fogarty and his tribe, made the Floods show all the team of which they were capable. The bell tolled as Adams threw in his sixth field goal, ending the game 47 to 40.

Able witnesses, who in their sober moments wouldn't be given to telling dreamy tales, say it was a clean cut battle. Picture-book passing was a feature and team work was as good as new on both sides. Charleroi ended the first half but two points behind Johnstown. The score was 22 to 20.

Newman was the boss scoring machine with Captain Jack Adams next. J. Brown pulled off the only spectacular play, when he shot the ball half the length of the floor for a basket.

Lineup
Johnstown 47 Charleroi 40
Fogarty..... F Adams
Newman..... F J. Brown
Keenan..... C Dohm
Wohlforth-Mayham G A. Brown
Kinkade..... G Herron
Field goals—Fogarty, Newman 3, Keenan 2, Wohlforth 4, Kinkade, Adams 6, J. Brown 3, Dohm 3, A. Brown 2, Herron. Foulgoals—Fogarty, 13 out of 19; Adams 10 out of 10. Referee—Roach.

COMMISSION DOWN TO WORK AT HARRISBURG

James Oates, lately elected to serve on a committee of the five coal mining districts of the State in relation to framing an employers' liability bill to be presented at the next session of the Legislature, returned from Harrisburg Saturday night. While at the State Capital, the committee interviewed Governor Tener, relative to a compensation bill, and in answer to a question by the committee the Governor said it would be one of the proudest moments of his life to sign a compensation bill, which he hoped to have the pleasure of doing in 1917.

The committee was very well pleased with the reception accorded them by the State officials with whom they had business and are enthusiastic in their regard of Governor Tener for the assurance he gave them of his devoted interest in the State having as good if not better compensation law than any other State in the Union. The committee also interviewed United States Senator Proctor. The Senator stated to the committee that he considered the passage of the act giving the Governor power to appoint a committee to present to the next Legislature a compensation bill, was a very wise one, and that he would assist and do all in his power to pass such an act at the next session of the Legislature.

Mr. Oates stated that the committee was more than pleased with many assurances received, that the next Legislature will place upon the statute books a very good liability and compensation law. The members have received copies of several other States' laws and have secured data from the different State officials from which they will gather the best so that there won't be much trouble to present to the next Assembly a clear and concise bill that will meet with the approval of a large majority of the Legislators and the people of Pennsylvania.

QUESTION IN NAME

(Continued from first page.)

primary ballot which would consequently become a cumbersome and unwieldy document.

Within a few days the Roosevelt delegate candidates, it is understood, will demand a ruling or will go into court and endeavor through a mandamus proceeding to secure an immediate ruling. The same situation exists in every county in the State as here, and candidates for delegate everywhere are asking that something definite be determined, in the placing of the present candidates' names after the names of the State delegate candidates on the primary ballot.

MORE THAN SKIN DEEP

More than a Skin Salve is Needed to Cure Piles Permanently. Don't be disappointed if you fail to get a lasting cure of piles with salves. The cause of piles is more than skin deep. It is sluggish, flabby veins—pockets filled with thick, bad blood.

HEM-ROID, a tablet tonic remedy is taken inwardly, acts on the circulation and cures all kinds of piles thoroughly.

PALACE THEATRE

The most home like Theatre in the Valley

Admission—5 and 10 cents

Something new every day or two.

Among The Passers

Johnstown fans are preparing to welcome the flag, but they aren't so dead sure of it yet. Three games above Uniontown isn't many.

Wohlforth got a bad fall at Johnstown Saturday night, but stuck out the greater part of the game. Then Maynam went in.

There wasn't any evidence of slump at Johnstown. Every man with Charleroi got a field goal and Herron was the only eminent who didn't get more than that.

Captain Jack Adams believes his

team will be in the best of shape tonight to break the hoodoo that has recently been dogging their heels.

What a job the referee would have if Uniontown and Johnstown should tie for first place this week and they had to play an extra game.

From being up against open style of play Saturday night, Charleroi will buck up against the chief exponents of the sticking plaster game to night, Connellsville.

Swenson, who plays the Uniontown heavy, according to some of the dope-

sters has a baseball future that is worth considering. "Swens" keeps himself in good condition always, and at present is an excellent pitcher.

CENTRAL BASKETBALL LEAGUE

To Mothers—And Others.

You can use Bucklen's Arnica Salve to cure children of eczema, rashes, teeter, chafings, scaly and crusted humors, as well as their accidental injuries,—cuts, burns, bruises, etc., with perfect safety. Nothing else heals so quickly. For boils, ulcers, old running or fever sores or piles it has no equal. 25 cents at W. F. Hennings.

Root and Herb Remedies

stand the test of time because they possess merit and though many years have passed since our American grandmothers commenced to make their annual collections of roots, herbs and barks, from which to prepare medicine to relieve different ailments science has failed to produce other remedies so dependable.

Many of these old recipes which our ancestors found so reliable have developed into proprietary medicines of world-wide reputation, such as Lydia E. Pinkham's Vegetable Compound the most successful remedy for woman's ills the world has ever known, and tons of roots and herbs are used annually in making it.
